Psionic Startsettings

To start with a Psionics session,
Place your target on the targetplate and maybe you want to connect a witness, belonging to the target, between one or two of the green clips on the right side of the box
Put on the headgear with the copper touching your third eye.
Turn all dials to the left, do this with caution, otherwise you may force a dial too much, so it might get damaged.
First, turn the Strength, or energize dial to the right, as far as possible, but again, do this careful and slow.
Turn the Choice dial carefully to the left. as far as possible.
Start to turn the first Tuning-dial from left to right while rubbing your thumb slowly and gentle over the rubbing plate, when you feel a “stick” the dial is set for your chosen purpose.
start turning the second dial and do the same as you did with the first.
Same for the third Dial. USING THE RUBBING PLATE NEEDS A LOT OF PRACTISE, if you find it easier, dowse with a pendulum for the right values.
Now start to create your thoughtform and visualize sending them thru the box, concentrate for 5 minutes and leave the box as it is. Leave it as long as you wish, but never forget to end a completed session with turning all dials to the left.
